EDUCATION

Bachelor of Technology in Computer Science

Jamia Hamdard University ,New Delhi

2022- 2025

Diploma in Computer Science

Aligarm Muslim University

2019 - 2022

Bishop George School & College Prayagraj

2018

EXPERTISE

- Html, Css, Javascript
- Database Management
- Front-End Framework
- Back-End
- Using Git
- Basic UPI use
- Responsive Design Basics

LANGUAGE

- English
- Hindi

PROFILE SUMMRY

A Computer Science and Engineering graduate with a strong foundation in Web Development and hands-on experience in JavaScript, React.js, Node.js, MongoDB, MySQL, and Java. Proficient in building RESTful APIs and developing end-to-end web applications. Completed multiple certifications and worked on real-world projects, demonstrating technical proficiency and problem-solving skills. Known for effective teamwork, leadership abilities, and active involvement in student initiatives throughout college. Eager to continue growing as a developer and contribute to the software industry.

PROJECT

Food Odering Website

A food ordering website uses several programming languages to work properly. HTML and CSS are used to design the layout and style of the site. JavaScript makes the site interactive. For the backend, languages like Node.js, PHP, or Java are used to manage server operations. Databases like MySQL or MongoDB store user details, food items, and orders. These languages work together to create a smooth and easy online food ordering experience.

Designing Of E-Voting

E-voting systems are designed to securely collect and count votes online. They ensure privacy, accuracy, and prevent fraud. The design includes user login, vote casting, and result counting with data encryption, making elections faster, reliable, and more accessible for voters. Languages used: HTML, CSS, and JavaScript for the frontend; Java, Python, or PHP for backend logic; blockchain (sometimes) for secure vote storage; and MySQL or MongoDB for the database.

INTERNSHIP

GOA TEK INC

244 Fifth Avenue, Suite A31, Manhattan, New York, 10001, USA

- Working with the wider development team.
- Manage website design, content and Branding and Logo Design
